

Providing superior protection against particulate contaminates.

DESCRIPTION

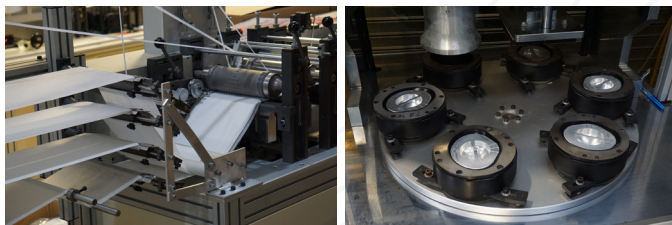

This Help-It® P2 respirator is a single-use, disposable molded cup style respiratory mask that provides respiratory protection from the transfer of micro-organisms, body fluids, thermally generated particulates, and particulate material.

FEATURES

- Electrostatic media ensures efficient filtration of microscopic particles.
- Closed-cell foam nose-piece is fully integrated into mask edge, providing superior seal in nasal area and helping prevent fogging of eye-wear.
- Lightweight alloy nose bridge works with foam nose-piece to increase seal of mask.
- Straps are welded into place, no need for staples.
- High quality elastic straps ensure even tension for the life of the mask, regardless of head size.

MANUFACTURING CAPABILITIES

- 26 respirator and mask manufacturing machines.
- 24/7 full shift production.
- QSi is equipped to meet customer demand and short turnaround times.
- All masks before final packaging go through a detailed inspection process as part of our commitment to quality assurance.

RESEARCH AND DEVELOPMENT

Our design teams, utilise the latest CAD technologies and manufacturing expertise to enable rapid new product designs and efficient introduction to market. Customer enquiries are welcomed for specific product designs.

PRODUCT CODE:

MKP2MC-STD - Standard size
BOX = 20 MASKS CTN = 12 BOXES

SPECIFICATIONS

Filter Performance ≥ 94%
Total Inward Leakage (TIL) ≤ 8%

STANDARDS

AS/NZS 1716:2012

SUITABLE FOR	
Painting (oil, acrylic)	●
Paint stripping	
Welding	
Construction	●
Building maintenance	●
Sanding	●
Grinding	
Sweeping	●
Gardening	●
Working with waste or compost	

Facial hair can compromise the protective seal of the mask. Always perform a mask test before use.
